I also recommend to connect to Internet so you can download the code from the internet and compare it with the code saved in the radio. Step 6:Next step is to turn on the vehicle and press the Vehicle button on the key . After that, the radio will detect an Unauthorized Vehicle and the radio will be blocked. Step 7:Then, press the Vehicle button again. The car will be rebooted and you can turn on the radio again. Step 8:Press Vehicle button a third time. The radio should have been activated and you can use it to listen to the radio signal. Step 9:If this error occurs, the vehicle is in unauthorized state. Connect the vehicle to the Internet and navigate to the Internet via the browser. In the , you need to change the radio code so that the radio can work properly. Note:The radio code is saved in the memory and it will be erased when you turn off the vehicle. To prevent this, you can save the radio code to the computer's SD card. *The F# "lux intelligent car light provides a clear signal. * Step 10: Turn on the vehicle and press the Vehicle button. You should see a light display on the key in the console. Step 11: Enter the proper radio code so that the radio can be activated. The * light on the key will turn off and you can use the radio signal. * Car Radio Reset The radio code is saved in the memory and it will be erased when you turn off the vehicle. To prevent this, you can save the radio code to the computer's SD card. Step 1: * Open the computer and press the USB to connect the PC. * Step 2: In the computer, select the device (USB) to connect the car. Step 3: Next, it will show the device name. The name of the device is *Radio4C. * Step 4: Now, open the memory card. Press the button above the Memory card. The card should show the message "do not remove". Now remove the memory card from the computer. Step 5: Next, press the button to access the card. You should see the file in the computer that is the file for the car's radio code. Step 6:Select the file named * 82157476af
